

Make Me Believe

A moment's silence is all I need
Some peace and quiet, to reflect on all I've seen
Embrace the moment and breathe it in
Refine the notion that there's everything to win

I see you now - you show me how to accept what was there
To guide the way and let me say there's reason to care

So hold me, make me believe
Know that my faith in this day won't deceive
Highs and lows, bouncing around;
shedding some light on the dark when-- we're down

Refresh my feelings
Restore my pride
Give my life meaning,
then my arms are open wide

I see you now - you show me how to accept what was there
To guide the way and let me say there's reason to care

So hold me, make me believe
Know that my faith in this day won't deceive
Highs and lows bouncing around
shedding some light on the dark when-- we're down

So hold me, make me believe
Know that my faith in this day won't deceive
Highs and lows bouncing around
shedding some light on the dark when-- we're down

I see you now - you show me how to accept what was there
To guide the way and let me say there's reason to care

So hold me, make me believe
Know that my faith in this day won't deceive
Highs and lows, bouncing around;
shedding some light on the dark when-- we're down

A moment's silence is all I need
is all I need
is all I need
